The Situation

Mobile phones are essential for communication, entertainment, and daily tasks, but battery life remains a major limitation. In situations without access to outlets or power banks, such as remote areas, travel, or emergencies, phones can become unusable.

According to ANKER:

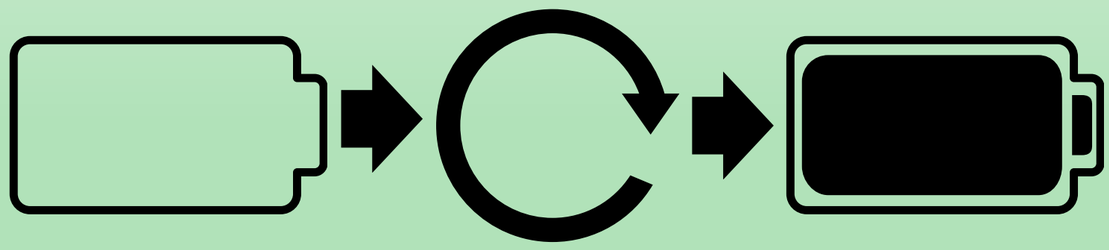

68% report their phone dies weekly, with 31% reporting daly phone deaths

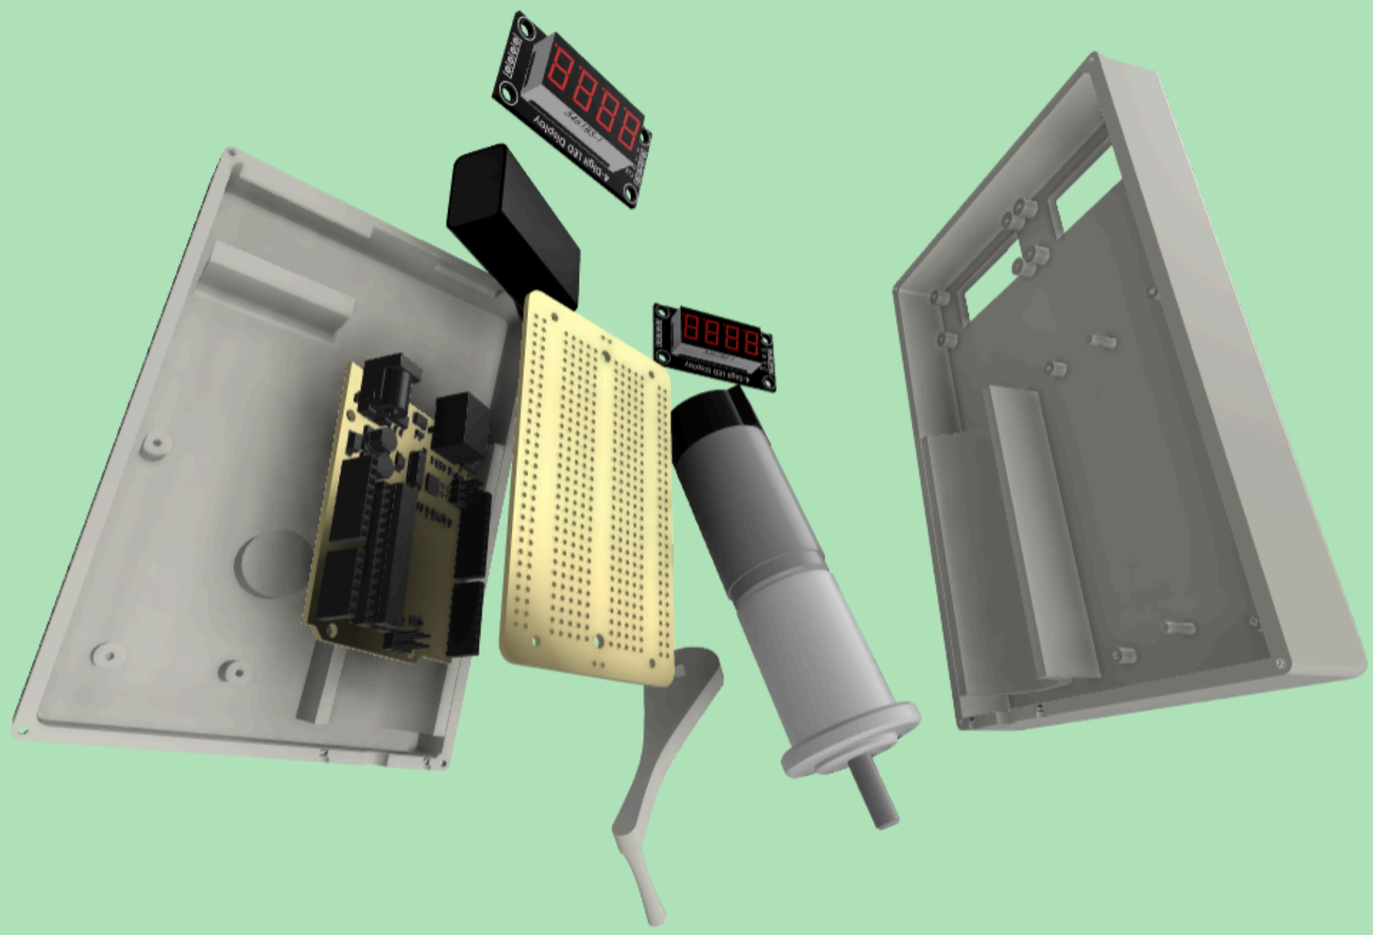

56% report that they dont charge their phone until it's <20%

The Solution

We developed a compact, user-powered Handheld Phone Charger for situations where traditional charging options aren't available. The device provides a reliable, lightweight charging solution that doesn't rely on outlets or power banks, and it includes real-time tracking of output voltage and user RPM.

Drain. Crank. Charge.

Anywhere Anytime Any Percent
